DIVISION OF
OIL, GAS & MINING

MARCH 8, 1981

Dear Sir,

It should be brought to the notice of the Board of Examiners that Luki Milling Company with the brainchild being Carroll J. Hart, and in all the dealing of the said company he is known as C.J. Hart.

For more than 2 years this company under complete control of C.J. Hart has on more than one occasion attempted to defraud the mining communities of more than one town or city in this country. It has been the come on to entice innocent people such as Mining Engineers, and owners of properties, and companies with heavy equipment and endless banks and financiers and private families and individuals interested in making a business out of mining. The come on has been the Corporation and its shares, even though names have been used in so called Minutes in a book he carries with him but so called meetings carried out by him alone and typed by we assume his daughter as her name is registered as an agent, such a book is vastly different from the other ones we are told are with the registered members of the Luki Milling Co., in Vernal, Utah.

When my attention was brought to the notice in the Moab paper concerning the approval I feel it is in the best interests of the owners of the property and the man in Colorado whom is supplying the Technology, and building the equipment for the project and whom is of the impression that all is well and honest.

BUT, he is in for a shock when he finds out that this trick been played on others before him and the Tibbetts in other deals only this time it was required to apply legally for a license. The registered names for the Corporation are altogether from some of the books and so called minutes he carries around with him to defraud the public.

It would be proper to inform the owners of the property and the man in Colorado whom is known to the Tibbetts family of these objections before Mr. Tibbetts he is honest and so is the man in Colorado but it looks as if they will be involved in a big Lawsuit and the property tied up in a scandal in the Courts if you approve of the permits to C. J. Hart.

One company refused to do business with Hart after they checked the Secretary of State and the Securities for the registered names.

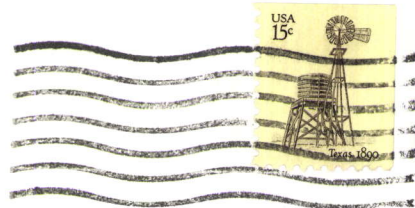

You should ask to inspect all books through Mr. Tibbetts and the man in Colorado, this way you will be able to get these without the possible trick being pulled as to the other set being presented to you by Hart. He Hart travels very much through the different states to keep his nose up to date with his new associates and to keep them up to date with the minutes of the corporation, not as to the correct names as he is suspected of attempt- to defraud them out of their property and equipment on behalf of his friends and daughter in Vernal, Utah.

They control the mail in Vernal, all the time whilst the Securites are of the impression he is legitimate and as we all know he is in default of the Laws of the State. Luki Milling Company has done untold harm do not let it fool the Board of the Oil and Gas and Mining. Its a Stock Fraud.

Highly Confidential

L. Hussey,
Murray, Utah.
